RESEARCH INTERESTS	Human-Computer Interaction (HCI) , Game Storytelling, Game Design, Creativity Support Human-AI Collaboration, Data Visualization	
EDUCATION	ShanghaiTech University , Shanghai, China Master of Computer Science Advisor: Quan Li Sept. 2022 - Jun. 2025	
	ShanghaiTech University , Shanghai, China B.Eng. in Computer Science Advisor: Quan Li Sept. 2018 - Jun. 2022	
ACADEMIC EXPERIENCE	ViSeer Lab, ShanghaiTech University , Shanghai, China <i>Graduate Research Assistant (Advisor: Quan Li)</i> 2022 - present Research focused on visual analytics systems for <i>game algorithms</i> and creativity support tools for <i>game storytelling</i> . My work includes: - Designed and evaluated a visual analytics framework integrating a scalable churn prediction model with two Explainable AI methods, providing actionable insights to game designers to reduce player churn. Conducted user interviews and a within-subjects study to validate its effectiveness and usability in real-world scenarios. - Developed and evaluated a visual analytics framework for in-game friend recommendation systems, incorporating methods to balance similarity and diversity. This framework supports fine-tuning recommendation processes based on player feedback and behavior. - Created and evaluated an in-game mod for automatic clue capture and classification, enabling interactive storytelling through an open-source platform. Conducted a between-subjects study to evaluate the effectiveness and usability of the system.	
	The HCI Initiative, Hong Kong University of Science and Technology , Hong Kong, China <i>Graduate Research Assistant (Advisors: Xiaojuan Ma, Jianping Gan)</i> 2023 - 2024 Visual analytics on <i>South China Sea</i> . - Processed 30 days of 3D ocean data, generating vector fields for ocean currents and performing ocean volume modeling to create a realistic environmental dataset for analysis. - Built an interactive visual analytics system in Unity 3D, integrating Cinema4D for terrain modeling, Unity VFX Graph for ocean currents, custom shaders for volume rendering, and interactions for precise ocean area localization, enabling users to explore and interact with the ocean environment.	
	User eXperience Center, NetEase , Shanghai, China <i>Research Internship (Advisor: Wei Wan)</i> 2022 - 2023 (Overlap with ViSeer Lab) Contributed to the development of visual analytics frameworks for churn prediction and diverse friend recommendation systems, in collaboration with ViSeer Lab.	
	ViSeer Lab, ShanghaiTech University , Shanghai, China <i>Undergraduate Research Assistant (Advisor: Quan Li)</i> 2021 - 2022 Visual analytics systems for e-commerce.
